CNN Doc Says Donald Trump Sleepy Dementia Idiot, And White House Is MAAAAAAD

L, Dead Inside, R, Dead Outside

Did you all hear? Donald Trump went to the doctor again for the 507th time this year, just to be told *again* how perfect and virile and sexually impressive he is. At Walter Reed! That's what they say!

Donald J. Trump

@realDonaldTrump

Just finished my 6 month physical at Walter Reed Military Medical Center. Everything checked out PERFECTLY. Thank you to the great Doctors and Staff! Heading back to the White House.

See? That's what they say!

Whaddya bet they gave him another [dementia test](#), whether or not he demanded it, which we are sure he did? And whaddya bet he identified "cow" *perfectly* on the first or at least fourth try? Because what is Donald Trump? Not dumb, if that's what you are asking!

Here is Trump explaining this weekend that he just found out “dumb” has a “b” in it.

“Most people don’t know” there is a “B” in dumb. This is Trump’s universal tell for when he learns something brand new and it blows his mind.

So with that background out of the way, we can discuss the fact that a doctor on CNN has assessed that Trump has “somnolence,” by which he means that Trump cannot stop falling asleep. Based on our medical understanding, we think this means Trump is at least half-dead, if not more.

Dr. Jonathan Reiner said that Americans need to understand if Trump is capable of doing his job, considering how he is always ZZZZZZZZZZZ. He wants to know why Trump has all those [disgusting, sickening bruises](#) all over his hands. Pretty sure we all need to know why “cankles.”

And he said:

“The president has severe daytime somnolence,” he said. “He falls asleep very often. He’s fallen asleep in the Oval Office on multiple occasions with people talking to him in the cabinet room, and there was concern yesterday that he might have fallen asleep at Arlington National Cemetery during Memorial Day observances.”

Sounds pretty hopeless!

[Wonkette \\$ machine!](#)

Reiner also said:

Reiner added that with daytime somnolence comes an increased risk of dementia and heart attacks, lowered cognitive function, and a decline in mental faculties.

“It’s a real problem,” he said. “And the president appears to struggle to stay awake during the day. And I’d like to hear what the White House has done to evaluate- why the president has this increased daytime somnolence and what they’re doing to improve that.”

Increased risk of dementia, lowered cognitive function and mental decline? Now that sounds like the current president of the USA! Could it be because he spends all night every night on his golden toilet reposting racist and Nazi and other AI memes? If he stopped doing that, could he get his brain back to 2016 levels, bearing in mind of course that Donald Trump is the stupidest person who ever fell out of God’s back hole after God ate late night McDonald’s, so we might not be able to tell the difference?

So many questions.

And how triggered is the White House by this CNN report about Donald Trump’s obviously lacking mental faculties and propensity for dropping dead every few minutes, only to [fart/shit himself awake](#) moments later?

Very, very triggered.

They think they are being clever and replying with zingers by posting screengrabs of CNN hosts blinking or just looking down, in order to accuse *them* of sleeping. Also hosts from *The View*. You know, as if we have never watched Trump on live TV falling asleep and dreaming of doing whatever he did to kids in the Epstein Files, if we had to guess.

Did [@KateBolduan](#) and her guest on Fake News CNN just fall asleep mid-interview? Their eyes are CLOSED!

What are they hiding about their health?

@RapidResponse47

What's going on with [@Kevinliptakcnn](#)'s health?

He's sleeping on air!

Rapid Response 47

@RapidResponse47 · 18h

You're an idiot, [@Kevinliptakcnn](#).

The "threats to his life serve as reminders" that Radical Left lunatics — incited by outlets like gutter trash CNN — keep trying to murder him.

...

Rapid Response 47

@RapidResponse47

Wow! [@KateBolduan](#) just fell asleep AGAIN as Fake News CNN was baselessly speculating about President Trump's health.

Really makes you wonder what these clowns are hiding about their own health.

In this one they own-goal themselves by actually referring to Trump's constant dementia tests, which are only given to people whose brains the doctors are extremely worried about, the ones where Trump is always bragging that he identified "camel" correctly.

Well golly, those were some pretty good zingers, and the people who run that account are definitely going to have relationships with their children when they get older.

In summary and in conclusion, ever heard all those rumors of how Donald Trump smells like he produces human shit in his pants all the time? Incontinence is another sign of being so old you're basically dead.

The end.
